

# Protec™

## Efficient just like your home

Would you leave the insulation out of the walls of your house? That's a simple question, really. Of course the answer is no. And it's the reason we have used our 4WALL Insulation method since the first Protec hot tub was built in 1983. Protec prevents air movement, giving you protection against heat loss. We've been building it the same way since then - a track record that you can count on for an energy efficient hot tub.

## Designed to run in any climate

If you're serious about year round enjoyment and therapy in hot water, consider a Protec equipped Beachcomber. We began building them with the harsh Northern winter in mind, to perform year round, even in the coldest weather. We never intended a hot tub to be restricted in use - you can enjoy it outside, no matter what the temperature.

# wrenches not required

Part of our philosophy of environmental conservation is our Guarantee. Don't bother with the wrench! We don't think you'll ever need service. But if you do, we want it to be the least of your worries. Our famous No Fine Print Guarantee gives peace of mind. We build an energy efficient, quality hot tub, and are proud to stand behind it.

## Protec 4WALL - built for today's consumer

Moving the power source outside the hot tub cavity gives you extra benefits that ensures comfort, and energy efficiency.

### Double Tiered Safety Entry Step

This custom built accessory gives you a safe, easy way to get in and out of your hot tub. It's a tough built, quality insulated step.

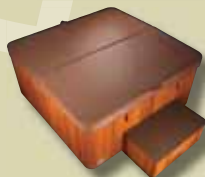

### Natural Soundproofing

Maintenance free Enviroskirt, coupled with our Protec 4WALL construction method gives you an integrated, quiet hot tub.

### 4WALL Insulation Package

All 4 walls are filled to keep heat in, and cold out. It's a Beachcomber Protec Standard, versus the traditional 3 wall construction method.

### Energy Efficient Operation

The Protec Construction Package is an integrated unit. It works together to give you the best quality, most energy efficient hot tub, to perform in all seasons.

### Maximum Interior Space Design

With the external power source design, we can focus on form, fit and function for maximum space for people inside the hot tub.

### Quick Service Access

Our equipment technology design gives you quick disconnect union kits for easy service and accessibility.

### Quiet, Efficient Operation

HushPump cleaning, heating, circulation and filtration gives you clean, sparkling water. It runs almost silent, 24 hours a day.

## YOUR BEACHCOMBER HOT TUB - ENGINEERED RIGHT FROM THE START.

### Large, Deep Soaking

When we first designed Protec, we wanted to maximize our interior space to give more room for people. Giving you the best comfort inside the hot tub is what your experience is all about. Our trademark deep footwell and contoured seating areas give you maximum comfort. Enjoy, and stretch out with family and friends every time you get in.

### Energy Saving Heatshield Cover

Capping your hot tub is an important part of quality construction. Our Heatshield Covers conform to ASTM standards, to give you years of top performance.

"Our team is proud to give you a high quality, hand built, energy efficient hot tub.

We invite you to experience the Beachcomber difference. Visit your local dealership today for free information and education."

Keith Scott, Founder  
Beachcomber Hot Tubs

### Maintenance Free finish

Enviroskirt plays a critical part of the hot tub's integrated unit construction. With tongue and groove construction, it's tough and durable and helps conserve energy - and it looks like real wood with its embossed finish. Enviroskirt, made with recycled plastic, finishes your hot tub perfectly.

### Quick Disconnect 'FormulaOne' Style Service

Our 'cab forward' external equipment design gives you maximum interior space inside the hot tub. It's like the Formula One car concept, with easy to service components. Everything is easily reached for quick service if it's needed, with the safety step cover doubling as your entry and exit route.

### SmartSense State-of-the-art Technology

What would a hot tub be without the best engineering available today? This state of the art digital panel is programmable, allowing you to choose your filtration cycles, reminders and more. Our equipment package comes with its custom made base - it's well engineered and energy efficient.

### 4WALL Insulation Prevents Air Movement and Heat Loss

A house with no insulation would let the draft come in and out - and worst of all, waste precious energy and money. Since the first Protec was built in 1983, we've built thousands of them, year after year. It's a time proven method of construction that we know will give you the best performance. In any weather, in any climate.

### The Small but Mighty HushPump

Our commitment to environmentally friendly soaking comes in a small package. The low cost, low electricity draw HushPump gives 100% water filtration, cleaning and heating, 24 hours a day. It heats and cleans with tremendous efficiency, turning the water over in the hot tub more than 100 times a day. It's an electricity miser, conforming to our commitment to energy efficient operation.

### Truth in Design

It may seem like a simple thing - but pioneering the entry safety step was an important part of our development. Most manufacturers built the accepted standard, with no step to get in. We saw that for children or the elderly, this was a problem.

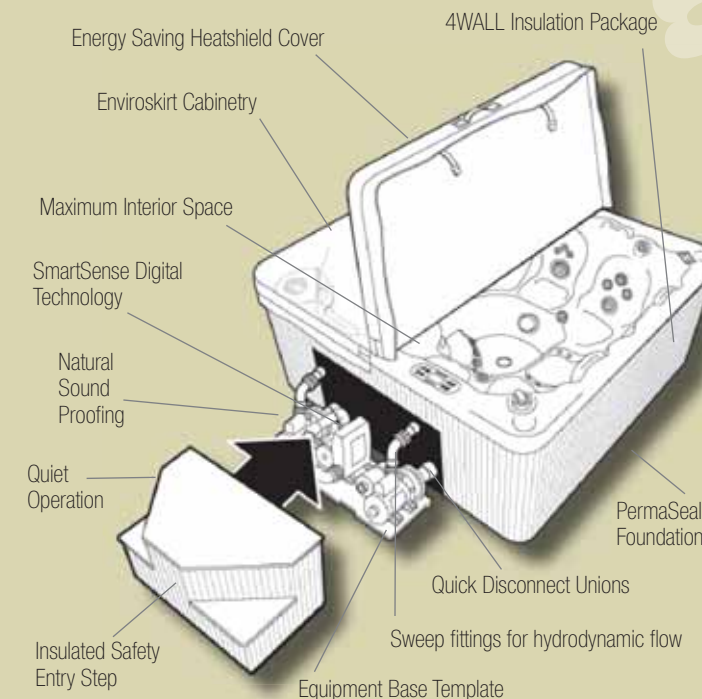

So we designed our own step, a custom built, matching accessory, vented and insulated. It doubles as the equipment cover, and best of all, it completes the hot tub experience, giving you ease of access every time you and your family uses your Beachcomber.

## Celebrating 30 Years of Quality in Design

### Proper Engineering Pays Off

Protec gives you a hand built, well thought out product. With Beachcomber's Protec Construction method and 4WALL Insulation, you get energy efficiency, safety, ease of use - and of course, a great looking back yard hot tub.

### Our philosophy from Day One

The first Beachcomber Logo, at left, still shows that we stand for... "Connecting families, friends & loved ones". We are celebrating 30 years of Wonderful Customers! Our thanks go to them for their support.

### Tethys, for the new Millennium

Our logo features a woman called Tethys, representing the mothers of the world, with their nurturing, caring way. We want to build your hot tub as we would for our own mother - and build it right. The Protec way.
